## Survey Evaluation Results

Dear Mr./Dear Ms Morsony,

In the attachment you will find the evaluation results of the survey 2022-SP-ASTR3600-001.

In AY 2017-2018, according to 20/AS/18/FAC, the Ad Hoc Committee on Student Opinions of Instruction Surveys “was formed ‘to consider the ramifications, and make recommendations, concerning the announced move by IDEA to eliminate paper survey instruments in favor of online-only instruments for student opinion of instruction.’ The Ad Hoc Committee’s recommendations, in summary, include: dispensing with IDEA as our survey instrument; replacing it with a campus-based instrument that is designed, reviewed and modified as necessary through the faculty governance process (with Faculty Affairs Committee taking primary responsibility for these tasks, in consultation with other appropriate parties); that this campus-based instrument be implemented and analyzed at the campus level as well; and that such a survey instrument, once implemented, be clearly understood as only one component of the process of reviewing faculty members’ teaching performance (as specified under Article 15 of the CBA).”

Consistent with those committee recommendations, the Student Perceptions of Teaching and Learning (SPOT) Survey, which has received both Senate and Presidential approval, will replace the current teaching evaluation instrument (IDEA) beginning this fall (2019). The statements and questions to which students will respond are new. In addition, unlike IDEA, the new SPOT survey is not nationally normed. Only CSU Stanislaus students will respond to this instrument.

This means that half of the courses surveyed will be below the median scores. In view of the novelty of this instrument, departments are urged to review their RPT elaborations and update them as necessary. Also, faculty members preparing WPAFs are encouraged to include additional methods/instruments of assessing student perceptions of teaching, take advantage of SPOT training sessions that will be organized by the FDC this academic year, and consult with the other faculty members of their department regarding this important component of WPAF preparation. Lastly, the URPTC and the Academic Senate discourages those reviewing files from making personnel decisions solely or primarily based on the teaching assessment reports derived from SPOT. The new instrument will enable the collection of useful information, but it is important to understand that information in the context of the new approach to soliciting student perceptions on teaching.

### INSTRUCTIONS ON HOW TO READ REPORT:

The overall indicator is followed by the individual average values of the scales.  
In the second part of the analysis, the average values of all individual questions are listed.

If you have any further questions do not hesitate to contact the Academic Senate Office.

Thank you.

## Comments Report

### 1. About the Course and Instructor....

1.10) What expectations did you have going into this course?

I knew it was going to be a challenge but it was doable.

None

My expectations were an easy course

1.11) What contributed most to your learning in this course?

I would say taking notes during class helped me the most.

Dr Morsony, group work days

The homeworks contributed the most

Lectures contributed the most, and were very interesting and informative

1.12) What grade did you expect to get in this course?

I honestly don't know, I just need to pass.

A

I expected to get around a C or B in this course

1.13) What additional comments or feedback would you like to offer this instructor

Some thing I would change is to have the bulk, if not all, the homework assignments be in the first half of the class, so when we are working on the final project we can solely focus on that.

I think a little more of a few hands on  
sessions for the python assignments. ~~2~~

I would have much rather had a final exam  
for this class than the research paper/presentation.  
It is causing me a lot of stress.
