# Survey Evaluation Results

Dear Mr./Dear Ms .,

In the attachment you will find the evaluation results of the survey 2022-FL-PHYS3010-001.

In AY 2017-2018, according to 20/AS/18/FAC, the Ad Hoc Committee on Student Opinions of Instruction Surveys "was formed 'to consider the ramifications, and make recommendations, concerning the announced move by IDEA to eliminate paper survey instruments in favor of online-only instruments for student opinion of instruction.' The Ad Hoc Committee's recommendations, in summary, include: dispensing with IDEA as our survey instrument; replacing it with a campus—based instrument that is designed, reviewed and modified as necessary through the faculty governance process (with Faculty Affairs Committee taking primary responsibility for these tasks, in consultation with other appropriate parties); that this campus—based instrument be implemented and analyzed at the campus level as well; and that such a survey instrument, once implemented, be clearly understood as only one component of the process of reviewing faculty members' teaching performance (as specified under Article 15 of the CBA)."

Consistent with those committee recommendations, the Student Perceptions of Teaching and Learning (SPOT) Survey, which has received both Senate and Presidential approval, will replace the current teaching evaluation instrument (IDEA) beginning this fall (2019). The statements and questions to which students will respond are new. In addition, unlike IDEA, the new SPOT survey is not nationally normed. Only CSU Stanislaus students will respond to this instrument.

This means that half of the courses surveyed will be below the median scores. In view of the novelty of this instrument, departments are urged to review their RPT elaborations and update them as necessary. Also, faculty members preparing WPAFs are encouraged to include additional methods/instruments of assessing student perceptions of teaching, take advantage of SPOT training sessions that will be organized by the FDC this academic year, and consult with the other faculty members of their department regarding this important component

of WPAF preparation. Lastly, the URPTC and the Academic Senate discourages those reviewing files from making personnel decisions solely or primarily based on the teaching assessment reports derived from SPOT. The new instrument will enable the collection of useful information, but it is important to understand that information in the context of the new approach to soliciting student perceptions on teaching.

#### INSTRUCTIONS ON HOW TO READ REPORT:

The overall indicator is followed by the individual average values of the scales. In the second part of the analysis, the average values of all individual questions are listed.

If you have any further questions do not hesitate to contact the Academic Senate Office.

Thank you.

## 1. About the Course and Instructor....

# Comments Report

### 1. About the Course and Instructor....

1.10) What expectations did you have going into this course?

course, and course, and how matterial course, and how matterial

I expected to be taught mathematical concepts that are useful for upper-division physics courses.

I did not how very expectations going who this dees

I thought it'd be difficult to transition back to insperson instruction

1.11) What contributed most to your learning in this course?

mathibates most to my levening alking drestions

Practicing homework problems and feedback from the professor.

The instructor kens quailable to grown and quarton reliable to the class work.

Working the homework assignments

1.12) What grade did you expect to get in this course?

I expe(+8) to get at least a B.

an A

1.13) What additional comments or feedback would you like to offer this instructor

rery clearly on the flapoldto.

All clearly on the flapoldto.

The homework should have hard leadlings and Dr. Musery should grade them in a timely manner.

The main piece of feedback is more organization on the whiteboard. Sometimes all the earetrons get mixed up because the writing is sometimes all over the place. Also doing more example problems from the homework would be helpful.

01/30/2023

Being flexible on the dire date of the exam really below if we had anoth exam around the same time, it dellowed on to not be storis as much and he able to give puts of time to stood for both exams.

I do appreciate the extratime given for the assignments, with my schedule.
